Target Group : This course is designed for Administrator, Chief Engineers, SE, Executive Engineers .

Topic:- Hazardous Waste Management and Pollution Prevention Gain valuable skills from a world class expert in waste management and pollution control.

Date:- 21st To 23rd September, 2015, Venue:- HOTEL Bagmallo Beach Resort, Panaji, Goa

Opting for residential accommodation are requested to go directly and stay in A/C rooms at HOTEL Bagmallo Beach Resort, Panaji, Goa,
Check In :- 20th September, 2015 (Afternoon) & Check Out :- 23rd September, 2015 (Forenoon)

This Executive Development Programme is designed for engineers and technicians from a wide range of abilities and backgrounds and will provide an excellent introduction to mastering the management of hazardous waste materials as well as preventing contamination of the environment.

This knowledge make participants aware of the legal and regulatory aspects of pollution and the handling of hazardous waste materials within their plants. It will also allow them to reduce the amount of hazardous waste produced and save money through preventing personal injury and preventing or limiting the effects of accidental pollution.

WHO SHOULD ATTEND:

Anyone involved in the handling of hazardous materials, this includes, but is not limited to: Project leaders, Production managers, supervisors, engineers and technicians, Maintenance managers, supervisors, engineers and technicians, Consulting engineers, Chemical engineers and technicians, Plant engineers, Operation, inspection and repair managers, supervisors, engineers and technicians, Mechanical engineers and technicians Electrical engineers and technicians

PRE-REQUISITES: A basic knowledge of electrical, mechanical and chemical plant environments.

AT THE END OF THIS WORKSHOP YOU WILL:

Be able to identify potential sources of pollution in and around your plant, Be acquainted with the latest technologies and techniques for preventing contamination/pollution, Be acquainted with the latest technologies and techniques for handling hazardous waste materials

Be able to detect and measure the incidence of contamination Have the skills for managing hazardous waste materials, Know how to plan for and deal with emergencies

ACCREDITATION:

Satisfactory completion of this course satisfies the requirements of the International Association for Continuing Education and Training for the award of 1.4 Continuing Educations Units. The course also satisfies criteria for Continuing Professional Development according to the requirements of the Institution of Electrical Engineers and Institution of Measurement and Control in the UK, Institution of Engineers in Australia, Institution of Engineers New Zealand, and others.

COMPANION COURSES

NCTSR courses that will further enhance the knowledge gained from this workshop include: Practical Boiler Control and Instrumentation for Engineers and Technicians, Practical Centrifugal Pumps - Optimising Performance, Practical Boiler Plant Operation and Management for Engineers and Technicians

Structural Design for non-Structural Designers

Best Practice in Sewage Effluent Treatment Technologies

BASIC CONCEPTS Pollution monitoring technologies, Environmental effects of pollution/hazardous waste, Toxicology Radioactivity

REGULATORY CONSTRAINTS

Environmental laws, Regulations governing storage and transportation of hazardous materials (national, provincial, regional, municipal)

WATER SUPPLIES, Water treatment processes, Ground water management, Drinking water management

AIR, Pollution prevention, Pollution monitoring, Air cleaning

PERSONAL SAFETY, Handling flammable materials, Handling corrosive materials, Handling poisonous substances

Handling radioactive materials

POLLUTION/CONTAMINATION PREVENTION PROCEDURES, Material balance systems, Building/plant design/layout, Safety codes, Management systems

CONTINGENCY PLANNING

Planning for emergencies, Training of response teams, Protective equipment and clothing, Dealing with spillage

Dealing with release of hazardous substances into the atmosphere

MEASURING TECHNIQUES, Measurement techniques, Statistical sampling theory

COSTS AND BENEFITS, Cost-benefit trade-offs, Opportunity costs, Costs of implementing (or not implementing) safety measures, Ethical issues

PRACTICAL EXERCISES DURING THE WORKSHOP, Delegates will work on a recommendation addressing a particular safety concern (related to the handling of hazardous materials) in their own plant. **SUMMARY, OPEN FORUM, CLOSING.**
