Guidelines for preparation of Tableaux proposals for participation in the Republic Day Parade – 2018 :-

1. Suggestive List of Themes :

- a) Gardens of New Delhi.
- b) Evolution of New Delhi from 1913 till date.
- c) Swachh Bharat Mission.
- d) Smart City Project

2. Selection Process :

The tableaux proposals received from various organizations/ agencies are evaluated in a series of meetings of the Expert Committee consisting of prominent persons in the field of art, culture, painting, sculpture, music, architecture, choreography etc. In the first phase of selection, the sketch/design proposals are scrutinized and suggestions, if considered necessary, are given to carry out modifications in the sketch/design. Once the sketches/designs are approved by the Committee, the participants are asked to come up with three dimensional models of their proposals. However, entering into the model stage itself does not mean selection. The models are thereafter examined by the Committee for final selection depending upon various considerations. Not more than one tableau from an organization participates in the Parade.

Adequate time is given to the concerned agencies to make arrangements for attending the meetings of the Expert Committee. Non-attendance in any meeting means withdrawal and concerned agency will not be invited in subsequent meetings. All cost for attending the meetings is to be borne by the concerned agency. **All interactions with the members of the Committee will be made by the official representative of the organization concerned.** The artists/designers, etc. may accompany the official representative to suitably take note of the suggestions given by the Committee to carry out modifications in their respective sketch/design/model. **They will, however, not directly interact with the members of the Expert Committee unless they are specifically authorized by the Committee to do so to explain any specific point.**

1. The sketch should be simple, easy to comprehend and should avoid statistical data and unnecessary details. It should be able to convey the theme by itself through visual impact and should not require any explanation, writing or elaboration. It should have visual symmetry from both sides.
2. As far as possible, there should be some movement, sound and animation on the tableau.
3. Generally, the tableaux are mounted on the tractor/ trailers provided by the Ministry of Defence, free of charge.
4. The number of performers on the float should be kept to the minimum. Normally, one trailer not more than 10 persons should be performing. No performers are generally permitted to be on the tractor component of the tableau. Attractive ground elements, however, can be considered on a limited number of tableaux only if it goes with the theme.
5. In case of tableau on cultural, historical/ traditional themes, the colours, designs, costumes, materials, etc. used should be authentic.
6. The sketch should clearly depict as to how the tractor pulling the tableaux will be used as part of the theme. Camouflaging the tractor should be in the harmony with the main theme of the tableau. There should be gap of about 6-7 feet between the tractor and the trailer and /or between two trailers for turning or maneuvering. This should be taken into account while designing the tableau.
7. In case, the tableau is proposed to be integrated with a folk dance it should be ensured that the selected dance is genuine folk dance, the costumes and musical instruments are traditional and authentic.
8. While preparing the sketches and subsequently, three dimensional models, the participants may take into account the following approximately dimension of the trailers and tractors, which will be supplied to them for the fabrication of the tableau. Specifications of the trailer are :-
Length 24'8, width 8', height 4'2' and load carrying capacity 10 tones.
9. The length, breadth and height of a single tableaux should not exceed 45', 14' and 16' (from the ground level) respectively

3. Preparation of Sketch / Design:

The sketch / design (preferably in graph) on a scale of 1':1" should be simple, colourful, easy to comprehend and should avoid statistical data and unnecessary details. It should be able to convey whatever it presents, by itself and should not require any explanation, writing or elaboration. **Writing or use of logos on tableaux is not allowed except the name of States/UTs presenting which is allowed in Hindi in the front, in English on the back and in Regional language on the sides of the tableau.** Similarly, in case of Ministries/ Departments and other agencies, **name of the Ministry/Department/ organization is to be given in Hindi in the front and in English on the back.** Designs in virtual reality in the form of CD showing the various components displayed from different angles, can also be presented.

4. Preparation of models:

After the approval of the proposed sketch/design by the Expert Committee in its preliminary meetings, three dimensional model of the proposed tableau would be prepared on the lines of the suggestions given by the Committee for further inspection. Final approval for participation would be accorded only after the models of the tableaux are finally selected by the Committee.

5. Points to be kept in view while drawing up the proposal:

- (i) **One tractor and one trailer, upon which a tableau would be fabricated, would be provided by the Ministry of Defence, free of charges.**
- (ii) **No additional tractor, trailer or other types of vehicles would be allowed to be used in the tableau.** This aspect should be kept in mind while preparing the designs of the tableau proposals to be presented before the Central Expert Committee.
- (iii) There is no objection to the use of vehicles other than tractor and trailers for fabrication of tableaux to give them a different look. But these vehicles will have to be arranged by the sponsoring authorities themselves. Under no circumstance, the total number of vehicles used in a tableau or the total number of distinguishable mobile components of a tableau would be more than two.
- (iv) As far as possible, there should be some movements, sound and animation on the tableaux.
- (v) **The number of performers on the trailer would not be more than 10 persons. No performer is permitted to be on the tractor component of the tableau. Attractive ground element however can be considered on a limited number of tableaux only if it goes with the theme. These conditions are subject to modifications by MOD depending on the requirement of the tableau.**

- (vi) In case of tableaux on cultural, historical/traditional themes, the colours, design, costumes, materials etc. used should be authentic to present local flavour. The performers on the float or on ground should also look to be authentic in case any cultural or traditional event is being depicted.
- (vii) The sketch should clearly depict as to how the tractor pulling the tableau will be used as a part of the theme. Camouflaging the tractor should be in harmony with the main theme of the tableau. There should be a gap of about 6-7 feet between the tractor and the trailer and/or between two trailers for turning or maneuvering. This should be taken into account while designing the tableau.
- (viii) In case, a tableau is proposed to be integrated with a folk dance, it should be ensured that the selected dance is a genuine folk dance and the costumes and musical instruments are traditional and authentic. **The tableau and the dance should also have thematic unity.** The strength of the dance party, excluding those who are to perform on the tableau, **should not exceed 25 persons.** The video clippings of the dance may also be sent alongwith the proposals.

6. Dimensions:

While preparing the sketches and subsequently, three dimensional models, the following approximate dimensions of the trailers and tractors, which will be supplied to them for the fabrication of the tableau, may be kept in view.

Trailer

Length	:	24' 8"
Width	:	8'
Height	:	4' 2"
Load carrying capacity	:	10 tons

The length, breadth and height of a single tableau should not exceed 45', 14' and 16' (from the ground level) respectively. **If it is proposed to use any other vehicles under own arrangements, particulars thereof should be indicated in the proposal.**

7. Facilities to be provided by the Ministry of Defence:

During the meetings of the Expert Committee, the facilities such as a PC, LCD projector, DVD player and an overhead projector would be made available by the Ministry of Defence. Should there be any other support requirements, the Ministry may be informed in advance.

- 8. Last date for submission of sketch/design on September 12, 2017 at 3.30 p.m. (Note: The above guidelines are subject to modification as per the directions of the Ministry of Defence, GOI which shall be binding on the part of the bidders)
